

REDCLIFF REVIEW

OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 17.

THE REDCLIFF REVIEW.

THURSDAY, NOV. 22nd, 1928

Number 89

Juniors' Party Was Great Success

Was Well Attended by Both Young And Old

There was a large attendance of children as well as a good number of adults at the Junior's quereade and picnic party on Monday evening and on Tuesday morning. For their prizes were awarded by the judges (Miss Campbell and Mrs. Middleton to Evelyn Jones and June Millard (tie) for prettiest girl's costume; Evelyn Wilson for best girl's comic; Harold Wilson for Arnold Hurlbert, for boys comic; Louise Britt and Gordon Newham, little ones.

All kinds of games were enjoyed during the evening. Mrs. Lowrie contributed punch and several children recited, etc. Mrs. Davidson and Mrs. Davies assisted Mrs. Cooper in making arrangements and various others helped in other ways. Many thanks to all who kindly contributed money and refreshments.

INFORMATION FOR PROVINCIAL SPORTSMEN

Attention is drawn by the provincial game commissioner to a number of clauses in the Game Act which are being vigorously interpreted in some quarters. It is pointed out that nowhere in Alberta is there an open season for beaver and there is no open season for muskrat in that part of the province lying to the south of the North Saskatchewan river. Between that river and the Hungarian territory, during the months of October and November.

DOMINION WHEAT CROP ESTIMATE IS ISSUED

Alberta's 1928 crop is placed at 147,566,000 bushels or an average of 22 bushels per acre from the acreage sown in the province, in the crop estimate issued by the Dominion Bureau of Statistics during the past week. The figure compares with 171,286,000 bushels as shown in the final estimate of the 1927 crop. A considerable reduction from the early estimates of the yield in the western provinces has been made as a result of frost injury to the crop. Alberta's average wheat yield compares very favorably with that for the whole Dominion, which is placed at 20.8 bushels per acre.

HAIR INSURANCE CO'S GOING OUT OF BUSINESS

At least a dozen hair insurance companies, discouraged by the heavy losses of the last two years, have decided to withdraw from the Alberta field. This year the hair loss is estimated at approximately \$1,500,000. A direct result was an increase in the rates next year.

A favorable report in connection with gold dredging along the river near Medicine Hat has been received from a competent engineer engaged to investigate. A company is being formed in the Hat to go into this business.

Edmonton police are sure they have the man implicated in the Walsh robbery which took place on Oct. 15th when \$5,000 were stolen from the post office. News taken up over \$1,000 bills on the Hudson's Bay property in that city and among the bills were some stolen from the Walsh post office. When the news was received as having dropped the roll has been arrested.

Former Redcliff Man Dies at Grenfell

David Black Passed Away at His Home This Morning

Word was received in town today announcing the death of Mr. David Black, a former resident of this town, at his home in Grenfell, Sask. Mr. Black came to Redcliff in the boom days and built the block at present occupied by the Club Cafe. For a time he conducted a cigar store, billiard room and bowling alley in the building, which still belongs to his estate. While here he took an interest in all local affairs and for a time acted on the town council. Deceased was 62 years of age. He leaves a wife and grown up family to mourn his loss.

Brownlee Promises Development Policy

Says Province Will Make Most of Natural Resources

Continuation of a vigorous policy of development under the Natural Resources Development Act, passed by the last session of the legislature, is being planned by the government, according to Premier Brownlee.

In brief, the act authorizes the Lieutenant-Governor in Council to raise each year from 1928 to 1932, inclusive, not more than \$100,000 for the organization and supervision of any form or kind of research into the natural resources with a view to their development and application to industrial, commercial and other useful purposes; the completion of surveys of various descriptions and the acquisition of undeveloped land suitable for agricultural purposes.

ADDITIONAL LOCALS

While at his farm this week R. S. Furth trapped a fine big badger. He kept it alive and disposed of it that way for a fairly good figure.

Mr. and Mrs. Reg. Cann and Doreen Brooks and Mr. and Mrs. Harold Cann of Calgary were at home with their parents here for the holidays.

Thirty persons were killed in a terrific storm which passed over southern England last week. Property damage to both England and Wales was enormous. Thirty families are said to have been left homeless.

The Australian government, a coalition of 15 nationalities and "bunny parties," was sustained at the general election last Saturday. The Labor party made a few gains but the government has still a good working lead.

Reserve money for a wheat drive social to be held in the Parish Hall on Nov. 29th commencing at 8 p.m. Good prizes will be offered and a really happy evening will be enjoyed by those who are there.

The dance given last Friday evening by pupils of the high school was well attended and the evening passed off very successfully. The pupils made excellent hosts and carried out the evening's program in a very creditable manner.

George Koehler, the boy who was hurt on the spur track last week, is still in the hospital and we are informed that the limb is not healing as well as was hoped. It is feared that amputation above the knee will yet be necessary.

Work on grading the road between here and Medicine Hat is now completed up to the edge of the town. Although the grade is well built it is very rough and almost impassable. As a result most drivers are using the prairie trails in that direction.

DOUBLE EVENT FOR ST. MARY'S CHURCH

Bills are now out advertising an afternoon tea, sale of home cooking and what drive and dance under the auspices of St. Mary's Altar Society. All will be held in CEH hall on Friday, Nov. 30th. Afternoon tea will be served from 2 to 5 o'clock at which time the sale will also take place. The what drive will start at 5 o'clock and dance at 10. Good prizes for winners of what and good music for the dance. Luck will be provided during the evening. Admission \$1.00 a couple for the drive and dance; extra ladies 50c.

PUT IN A CULVERT FOR PRAIRIE TRAIL

As the work done by the government on the road between here and Medicine Hat, less than a mile trail in terrible shape for traffic, most auto drivers are using prairie trails from the top of the hill in Redcliff. As the grade is built up quite a height, with deep ditches on either side, it is well high impossible to get off the prairie on to the grade at any point. To obviate this Mr. Sellhorn has a culvert put in just at the top of the hill and filled in to connect the prairie trail with the main grade. This has made quite an improvement, and auto drivers are now commending the plan of Mr. Sellhorn for his thoughtfulness.

Unless the main road is gravelled this fall it will not be much use for traffic this winter.

Hon. Perrin Baker is advocating several changes in our present school Act and he expects to have them in shape to bring before the next session of the legislature. The changes, Mr. Baker believes, will greatly improve our system. Mr. Baker says "We have too many short term schools; secondary schools are not properly provided for, and thus the educational burden is unfairly divided. At present the assessed valuation of rural districts varies from a little more than \$5,000 to \$500,000 and the mill rate for education varies from a fraction over three mills to 50 mills."

Every editor an expert. The managers of the Family Hat and Weekly Star, Montreal, are all headed by men of practical experience and native-born Canadians who are first in public esteem. The subscription price is only \$1 a year or three cents for 62.

Auto Is Self Steering

"The heading of this article is not intended to mislead. The high power I mean pictured above is all of that and more as the steering wheel acts only as a front wheel brake, and all four wheels are self-steering. The most remarkable fact in connection with the handsome automobile is that it was turned out, just as it appears, from the Canadian Pacific laboratory works at Angus, Trent just five days. The wheels are flanged, with rubber linings between the steel tires. Supplementary flanges, with rubber linings, are placed on the rear wheels for traction. Flange is powerful hand and a house. Canadian Pacific engineers will use the car for inspection purposes."

AIR SERVICE FOR THIS CHRISTMAS MAIL

Christmas packages crossing Canada may be mailed a day earlier this year. The institution of an air mail service between Winnipeg and Calgary will clip twenty-four hours off the trans-Canada journey. A contract for a three week test during the Christmas rush has been made with the Western Canada Airways. Service will go into operation on Dec. 19th, and will last until the end of the month. If it proves practicable, it will be made permanent.

Medicine Hat Legion Visits Local Branch

Planned Evening Spent With One, Cards and Rings

About thirty members of the Medicine Hat Legion visited the local branch of the Medicine Hat Legion last Friday evening for the purpose of having a friendly tournament in cribbage, rube and billiards. In all the members the most friendly rivalry prevailed and a most enjoyable evening was spent. Redcliff was successful in winning out in both cribbage and rube but the visitors won in billiards by a narrow margin. The score for the cribbage was Redcliff 24, Medicine Hat 22. In rube the score was Redcliff 805, Medicine Hat 847. The billiards score was Medicine Hat 371, Redcliff 536.

Redcliff will pay a return visit to Medicine Hat next Friday evening and it is hoped there will be a good turn out from here. Cars will leave the club room here shortly after seven o'clock.

ALBERTA HOMESTEADS IN GREAT DEMAND

Alberta has taken a commanding lead among the western provinces in the number of homestead entries for the nine months ending Sept. 30th, 1928. Homesteads to the number of 9,253 have been filed on in the province during that period as compared with 4,601 in the corresponding months of last year. Of this number homestead entries in Alberta totaled 5,471 as compared with 2,281 in the same time last year. While this figure includes a number of second homestead applications under the new regulations, it is stated that the greatest majority represent new settlers who are taking up new land to establish homes in the province.

Young Gets Decision In Saturday's Fight

Did Not Show As Much Vim As Backers Expected

In the boxing contest at Medicine Hat last Saturday night, Cecil Young, formerly of Redcliff, won the decision over Sam Leonard of Nova Scotia. In its account of the fight the News says: "Although not lacking in aggressiveness Young did not put as much vim into his efforts as his physique would lead one to expect, which lack, had it not been for the punishment he handed out to his opponent might have left him the blithe on points. However, he shined up as a promising heavyweight with a wallop on each hand and very fast when he lets himself go." The preliminary Joe Jackson, of Redcliff put up a stiff battle against Emil Lust."

Churches

The enforcement of the Game Act has been taken over by the provincial police office.

ST. AMBROSE CHURCH

Rev. J. L. Cooper
Sunday next before Advent, Nov. 25th.
Lectures 10:30 a.m.
Sunday school at 10
Mattins and sermon at 11.
Evening and sermon 7:30

Tuesday, Nov. 27, children's day service in church 4:15
Friday, (Nov. 30, St. Andrew's Day, W. A. Corporate Communion at 9:30 a.m. Choral of prayer from 10:30. Evening with special intercession 7:30. Choir service.

Note—At the children's service on Advent Sunday, Dec. 2nd the number of tons will be presented to be sent to our Indian school for Christmas.

GORDON MEMORIAL UNITED CHURCH

Rev. W. B. Smith, Pastor
Organizations meet as follows: and to share in the activities of Gordon Memorial church.

Strangers and visitors are very cordially invited to attend the service. The Official Board on 2nd Tuesday in each quarter at 8 p.m.
Organizations meet on the 2nd Tuesday of each month at 8 p.m.
Women's Missionary Society on the last Thursday of each month at 8 p.m.
Ladies Aid, every Thursday, 8 p.m.
Mission Band every second Monday at 4:15 p.m.

The subject at the morning service will be "John Bunyan's 'Pilgrim's Progress'." At the evening service there will be short readings from the famous book "The Pilgrim's Progress," and gospel song to fit the thought.

Mrs. J. Stratton, superintendent of the Cradle Roll, entertained the mothers and babies in the church on Wednesday afternoon. There was a large number of mothers and babies were weighed, games played and plenty to eat. A very happy time was spent.

Nominations for the Boys' Parliament must be made by Nov. 24th. We expect to send a boy as has been done for the last two years. The large number reported to the General Synod of the United Church of Canada in 1928 was 14. The Sunday School passed the century mark in attendance last Sunday and we hope the good work will continue.

CHURCH OF THE BRETHREN

Rev. D. Hollinger, Minister
Usual services.

ST. MARY'S CHURCH

Celebration of Mass, Second and Third Sundays of each month at 8:30 a.m.

A revision of the Alberta School Act is being prepared and will be presented at the next session of the legislature.

Jenner Farmer Charge Against Wheat Pool

Claims Million Dollars of Pool Money Illegally Spent

Charges of wrongful distribution of \$1,000,000 of pool contract signers' money is alleged in an action instituted in the Supreme Court of Alberta, by Har old W. Jenner, farmer of Jenner, against the Alberta Co-operative Wheat Producers, Limited and Alberta Pool Elevators, Limited. Jenner was a member of the Alberta Wheat Pool from 1924 until 1926, and declined to renew his contract on expiration. Jenner charges that the Pool loaned a subsidiary company, without adequate authority, large sums of money, failed to collect interest on the loans. Farmers should not get excited over this until the case is heard. Pool officials will, no doubt, be able to give a satisfactory account of all their business transactions.

Every branch of farm work, farm machinery, stock, etc., has an expert writer in the Family Hat and Weekly Star, the recognized first writers in Canada.

Here and There

The provincial Government at Nova Scotia has arranged to have the Bay of Fundy declared a reserve of the Dominion of the Father River area, Duxbury County. A similar reserve has been set aside on a smaller scale in the West coast district, Halifax county, last year.

The vicious dog fish of the Pacific coast has at length found its place in the scheme of economic melange, judging by a new tax imposed by the British Columbia government. The fish oil is the base of a premium on the fish. The fish is a vicious, voracious and voracious beast. Several barrels a day of dog fish oil are being used in the manufacture of the premium.

A Pacific Coast mariner whose name is well known throughout the country has accepted the invitation to retire from active service. Captain James D. Thompson, retired after 25 years of continuous service on Pacific coastal waters, 25 years of which he spent in British Columbia. He has relinquished his position of command of the British Columbia coast steamship service of the province. The position of the place has been taken by Captain Thompson, formerly active service.

Golf in the heart of the Canadian Rockies is becoming as popular as a matter of course in the mountains at Castle Mountain-Banff House Camp. The largest golf course in the West is now open. This new resort is probably the most beautiful and most effectively situated of any golf links in the British Empire. The experience of a day of the course is the handiwork of a Stanley Thompson, internationally known golf architect, who also designed the recently enlarged Hotel at Banff.

Another recruit has joined the ranks of the famous United Church of Canada. The Canadian Pacific Railway supply firm, at Strathmore having sold one of their cars before to the Canadian Milk Company. The animal breed at the P. M. farm, is the first Holstein female from the Canadian Milk Company to be recorded the grand champion of the "A" breed show in the west, an honor which has previously been won by a male from Ontario or from the United States.

A scintillating negotiation has been entered into by the fisherman who for himself as a "privateer" will be made under his fish in competition with a daily stated and witnessed effort. The large number of fish reported to the General Synod of the United Church of Canada in 1928 was 14. The Sunday School passed the century mark in attendance last Sunday and we hope the good work will continue.

The Japanese coronation ceremony in November will probably result in a demand for more currency from this continent, said J. A. Laidlaw, Canadian Trade Commissioner in Tokyo who said recently that the Japanese government is planning to increase the number of yen notes in circulation. The Japanese government is planning to increase the number of yen notes in circulation. The Japanese government is planning to increase the number of yen notes in circulation.

TEA "is good tea"

Red Rose Orange Pekoe

is supreme

In clean, bright Aluminium.

Think It Over.

Hon. R. B. Bennett, in addressing the Maritime Veterans Club in Montreal, told a "Father Doyle" story, which he heard while visiting Nova Scotia last summer, a story with a point to it.

"Father Doyle was walking along a road there, before automobiles were allowed on Prince Edward Island—that is not so long ago—and he was overtaken by a farmer in a demerol. The farmer said, 'Will you have a lift?' and Father Doyle said he would be delighted. He got into the demerol and opened up the conversation by asking the farmer his name. 'My name's Murphy,' but I'm not a Catholic,' the farmer answered. Father Doyle suggested that they might have religious matters alone and get along quite well together. As they neared the journey's end, Father Doyle thanked the farmer, and offered to give him a little advice from an old man of long experience. 'When you do, you hope to go to heaven?' 'I hope so.' 'Well, remember my advice. When you get there, and go up to the golden gate and knock at the door, and St. Peter says 'Who's there?' just say 'Murphy,' and stop right there!'

Father Doyle's suggestion that we might have our religious differences alone and treat each other as fellow men—(say "Murphy" and stop right there)—is good advice. What says one daily paper in commenting on this little story, is wanted in a mind and a will have had their minds distracted from the real issue involved in the election by appeals based solely on the religious belief of one of the candidates for President. It is not that the candidate is questioned as to his faith, or an atheist, denying that he is a God, he believes in, and worships the same God as those who attacked him, but he was born into and brought up in respect certain doctrines and forms in one particular branch of the Christian church, just as his opponents were born into and brought up to respect and accept the doctrines and forms of worship in other branches of the Christian church. But these Christians could not agree on the question of the religious belief and unite on the great fundamentals of Christianity itself. With what result?

Great national issues affecting the whole life and future of the country, such as the prohibitory liquor laws, the tariff, the improvement of agriculture, public ownership of public utilities versus private and monopolistic control, and other real national questions, all became confused and mixed up in the minds of millions of people with the really inconsequential subject of one man's church affiliation. And what has been gained thereby? What remains after all the shouting is over? Old friendships of a lifetime broken, feelings of bitterness and hatred engendered, communities divided which were formerly united in work for the common good.

It is a repetition of the strife of the middle ages. Much the same thing has occurred in Canada over and over again, but no man living can point to any good resulting from such campaigns. Here in Western Canada our people pride themselves on their devotion to co-operative principles, and they can point to the accomplishment of great and lasting reforms because of their acceptance of, and devotion to co-operative policies and enterprises. But they still ask themselves how long that good-will and harmony so essential to the success of co-operative endeavor will last, not to mention its further development and growth in order that still greater things may be achieved. If they are going to give encouragement to feelings of bitterness and take part in campaigns of division based on the manner in which their individual members worship God.

In all matters of religious differences of opinion, Father Doyle's advice is good. Just say "Murphy" and stop right there.

Manitoba Hydro Plan

Provincial Government Has Program That Will Extend All Over Province

It has been announced that the Manitoba Government has decided to embark on a programme of Hydro-Electric power transmission line construction that will extend to all parts of the Province—to towns, hamlets, and farms—the Government to pay one half the cost, including lines already built. Under the new policy there is a guarantee of sufficient power, very low rates, and revenue in the way of rentals for power sales. Thus it has been stated on behalf of the Government, it is possible for the Government to undertake the housing of towns and farms from the increasing a dollar of capital debt, without the necessity of increased taxation, and without the risk of large annual deficits. This policy is

designed to promote industries throughout the Province and to lighten the labor and increase the comforts of the farm.

Proof Enough

Scene: A Chongway railway station. Old Lady (for the twentieth time): Is this really the train for Ayr?

Porter: With you, ma'am, the board of directors, the stationmaster, the signman, the guard, the driver, and myself think so, so I suppose it must be!

"Mrs. Green says she can't understand why her husband isn't well and out of the hospital long ago."

"She hasn't seen the nurse who attends him."

Prisoner 89466: "Stone walls do not make a prison."

Prisoner 4467423: "Well, this here concrete seem to do pretty well!"

H. B. Road Nearing Completion

Laying Of Rails Will Be Completed By Next March

The laying of rails on the Hudson Bay Railway will be completed by next March, Major Graham A. Bell, deputy minister of railways and canals, has announced, but considerable blasting will have to be done before the road can be opened for traffic. The work at Port Churchill, where modern harbor accommodations and harbor equipment are being installed, is being pushed ahead. It will require another three years to complete this undertaking. Discussing the development of Northern Manitoba, Major Bell states that there were many evidences of mineralization along the route of the railway, particularly as far north as mileage 200 north of the P.A. He felt that those deposits would play a great part in the opening up of that section of the province. Five thousand men are now employed on the railway and harbor work.

Tonic Treatment FOR INDIGESTION

Indigestion Comes With a Run-Down Condition—Relief Comes Through Enriching the Blood—Dr. Williams' Pink Pills Make New Blood

There are many symptoms of indigestion such as acute pain after eating, bloating, flatulence, nausea and vomiting, bloating and pains in the region of the stomach, to emphasize for the misery it causes. Indigestion and its use of indigestion will give you, but that is all, and meanwhile the stomach grows weaker. The work of digestion depends upon the blood and nerve and may be said to be of indigestion is to tone up the stomach and the nerves and enable the stomach to do its work with ease and comfort. Indigestion is a sign of a weak stomach. If you have the symptoms of indigestion, try the tonic treatment with Dr. Williams' Pink Pills at once and you will be gratified through the use of Williams' Pink Pills.

Among the many who have found relief through the use of Williams' Pink Pills is Mrs. A. Webb, R.N., New Preston, Conn. says:—"For a long time I went through the tortures of nervous indigestion. I could not eat and no other word can describe what I suffered. If my stomach was empty I retched. If I took food I vomited. I sleep, and I grew weaker. I doctored for months but with no benefit. One day my husband said, 'as the treatment you have had has not helped you, why not try Dr. Williams' Pink Pills?' I commented and he got me a supply. After I had been eating the pills for a while I knew they were helping me as the pains and retching grew less and less. I felt better and better. I had lost five years, and in a few weeks I had gained them back. After such a wonderful experience how can I do anything else but recommend Dr. Williams' Pink Pills."

If you need a blood-building tonic begin taking Dr. Williams' Pink Pills today. They are sold by all medicine stores or sent by mail at 50 cents a box by writing The Dr. Williams' Medicine Co., New York, N.Y.

Courtesy Well Remembered

A happy result of a servant girl's act of courtesy at Leeds has just come to light. Two or three years ago the girl, named Ellen Fellows, as stated an old lady across a busy street, and at the time the lady took a note of the girl's name and address. Recently Miss Fellows received a letter advising her of the old lady's death and a bequest of \$2,000.

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. If you know as well how this remedy would help you as do those who are grateful users, there would be a package in your home tonight. Try it.

A German botanist is reported to have succeeded in producing 40,000 varieties of dandelions. The majority of folk will feel that one variety is sufficient enough.

To safeguard the child from damage to the nervous system, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs internally affected by the worms, and will encourage healthful operation of the digestive processes. As a vermifuge it can be relied on for its effectiveness.

How often (to quote at the children's party): "Will you give them your song now, Mr. Mackin, or shall we allow them to enjoy themselves for another half-hour?"

Minard's Linctament Invaluable Everywhere.

Northern Outposts Are Cheered By Radio

Broadcasting Programs For Benefit Of Lonely Dwellers In Northland

Broadcasting programs to the Far North will be continued this winter, and messages will be sent to those police posts, missions and trading stations which are scattered throughout Canada's territory north of the 60th parallel. The program's commenced Saturday night, November 17, at 11 o'clock Eastern standard time, the Canadian Westinghouse Company operating the broadcast in conjunction with allied stations in the United States.

Officials of the Northern Territories branch of the Department of the Interior said that the success which had attended previous efforts encouraged them to continue. Gratifying results had been obtained, inasmuch as the lives of the men on the lonely outposts of Canada's northern empire had been greatly cheered by the contact with the world.

For the most part, the messages sent are of a personal nature, being expressions of regards from relatives of the men distributed throughout the north.

Another phase of the broadcast is one which assists the department at times in that instructions can be sent to officials in the north supplementary to those already given by mail.

A network of wireless stations now extends over the Northland.

People Should Rest More

Habit Would Store Up Reserves Of Health Says Great Surgeon

Dr. Berkeley Moynihan, the great surgeon, said that one way to keep young looking is constantly and regularly to allow the nerves to rest. A quarter of an hour's quiet and relaxation preferably in solitude, immediately after luncheon would store up reserves of health and vigor. When the famous Mayo brothers, the American surgeons, came to spend a holiday with him they never failed to allow luncheon to go to their rooms for a quarter of an hour's rest in complete isolation.

Another of Dr. Berkeley's maxims is that every man when he reaches 60, no matter how well he feels, should take three months' holiday. "Not more than three months for the man with an active mind," he says.

Made Best Guess

Little Albert came home from school with a new book under his arm. It's a pet model of a car. "A prize? For what, dear?" "For natural history. Teacher asked me to make a model of a car, and I made this."

"But an ostrich has two legs." "I know that now, mother, but the rest of the class said so, so I was nervous."

Nation-wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Eucalypti Oil have not been tried and proved. It is one of the most effective remedies for colds, sore throats, lame back and many other ailments. Rubbed on the skin its healing power is readily apparent, and it can be taken internally.

Schools For Prince George District.

A contract to cut creeling material for the General Motors, of Canada, is in prospect for the Prince George District, Central British Columbia, the Prince George Citizen states. The mill will be located at a point on the Prince Rupert line of the Canadian National Railways. General Motors use approximately 15,000,000 feet of creeling annually.

Useful In Camp.—Baptisms, surgeries, proctodermis and hunters will find Dr. Thomas' Eucalypti Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the hands will be warm and the feet will be in the mud, and should a cut, or sprain be sustained, nothing could be better as a dressing or ointment.

Southern Alberta Sugar Beets. The Barnwell district in Northern Alberta is coming along fast in beet growing, there being about 3,500 acres planted to the crop. The crop this fall, producing an average of 11 tons to the acre, but in some cases going as high as 15.

The Guide.—"Yes, it must be over thousand years old. You can take it from me they don't build such ancient castles nowadays."

Not Always

"I have always felt a prejudice against the word 'lady,'" said a man. "Because because of the frequent misuse, I have found that while every lady is a woman, every woman, of course, is not a lady."

Minard's Linctament For Coughs.

FOR RHEUMATISM

ASPIRIN

BAYER

Perhaps you didn't realize that Aspirin tablets are made to relieve the deep-down rheumatic aches as well as dispel the occasional headache. They do! In cases of neuritis, neuralgia, rheumatism, for those pains that penetrate one's very bones, Aspirin tablets offer relief. Just be sure you are getting the real Aspirin, with Bayer on each tablet and on the box—with proven directions inside. All druggists.

Physicians prescribe Aspirin; it does NOT affect the heart.

Aspirin is the trade mark (registered in Canada) indicating Bayer manufacture. While it is well known that Aspirin means Bayer manufacture, to insure the public against imitations, Bayer has decided to add the word "Aspirin" to the trade mark.

Salads For Health

Vegetables and Fruit Needed in Winter As Well As Summer

Do not allow yourself to get away from the daily salad habit, but that the weather is getting colder, and some of the usual salad ingredients are not at hand.

Health demands plenty of green vegetables and fresh fruit, in winter time as well as in summer. Here is an exceptionally good little salad that may be prepared at this season—at very little cost, too!

Peel oranges and remove all white skin. Cut into one-fourth inch slices and cut each slice into halves. Dice celery and apple and mix with mayonnaise. Arrange a circle of half-slices of oranges on a lettuce-covered salad plate, fill center with apple and celery mixture, and garnish with celery tips.

There is no poisonous ingredient in Jalloway's Corn Remover, and it can be used without danger or injury.

Heaviest Wheat Yield

Eight hundred and eighty-eight bushels of wheat from ten acres or 88.8 bushels an acre are reported by Fred Smith, who farms 100 acres in the heart of Calgary. This is the heaviest wheat yield ever recorded in Alberta.

Baby's Colds

Best treated without dosing—Just rub on VICKS VapoRin

Cut Down Food Wastage

---by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary lined-edge carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stations.

Phillips' Milk of Magnesia

Too Much Acid

Many people, two hours after eating, suffer indigestion. This is usually excess acid. Carry it off with an alkali. The best way, the quick, harmless and sure way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times as much stomach acid, and at once, The system disappears in five minutes.

You will never use crude methods. And you will never suffer from excess acid. And you will never suffer from excess acid. And you will never suffer from excess acid.

New Diphtheria Vaccine A Success

French Scientist Says Disease Will Be Unknown In Few Years

"It is only a question of a few years before the dread diphtheria with all its attendant horrors—such as throat and various forms of bronchitis, will be entirely unknown in France and, we hope, throughout the rest of Europe." This is the prophecy of Dr. Hannon, of the Pasteur Institute of Paris, who with his colleagues at the special diphtheria section at Garches, on the outskirts of Paris, has decided to spend the coming year in improving the vaccine which has given remarkable results during the past four years.

The experimental laboratories at Garches have been something like a revelation to the several hundred of European and American scientists who have visited and signed its registers during 1923. The first impression of the premises is of a royal stateroom "gone to seed." The diphtheria was primarily designed as an experimental hospital for horses and cattle and it was with treating these animals that Dr. Hannon discovered his vaccine for diphtheria among humans.

And the results were not satisfactory, and Dr. Hannon found himself in convincing his colleagues that France was not to get the cure this year. "The military hospitals were used to provide patients for the vaccine, and month by month the vaccine was made purer and stronger, the results became little short of remarkable. A winter attack of diphtheria was followed by a summer throw half of an infantary company into the isolation wards. After a few days treatment with the Hannon vaccine, it was found that the isolation bars could be lifted without danger to others in the hospital."

Similar results were obtained in the schools and Dr. Hannon believes that this year's records will show that the vaccine is sufficient to protect children, after their initial vaccination, of nearly 100 per cent. If this can be attained, efforts will be made to make the use of the vaccine compulsory throughout France. So great is the confidence of foreign scientists in the effort, thousands upon thousands of bottles, prepared for urgent cases of diphtheria, are being shipped to other countries every month, and so far there has been no complaint.

Eggs From Mature Hens Hatch Best

Shen To Give Better Hatching Results Than Eggs Laid By Pullet

Eggs from mature stock gave better hatching results at the Lenzowville, Quebec, Experimental Station, than those laid by pullets. In the report of the station for last year, published by the Department of Agriculture, at Ottawa, it is shown that hatchlings from the hens showed an average fertility of 90.25 per cent, as compared with 74.25 per cent, fertility from the pullets' eggs. Of the total eggs set, those from mature stock yielded 53.9 per cent of chickens as compared with 41.96 per cent from the pullets' eggs. The return from those laid by the hens was also slightly higher than those laid by the pullets. There was practically no loss of chickens among those hatched from the hens' eggs.

Like my old one pulsed ten eggs, and 't got six months. But your Bill stole twenty egg, yet 't only got three months. 'Ow 'you explain that, eh? Gett—'I s'pose they makes a reduction for quantity, ole dear."

Jack: "When I'd proposed he act like a hen out of water."

Pete: "Why shouldn't he? I know he was caught."

Very often the person who boasts of having no religious prejudice has no religion either.

"When did you get your diving license?"

"I hope to get it next month."

Pete Mele, Paris.

N. W. J. 1938

From Producer To Consumer

Consumers Benefit From Mechanism Of Distribution In Canada

A report has just been issued by the Dominion Bureau of Statistics giving in detail the results of a postal census of Trading Establishments taken in 1924, the main figures of which were issued by the Bureau some time ago. The object of the census was to obtain a measurement of the mechanism of distribution to Canadian consumers, and requires, however, by which commodities have been distributed to the ultimate consumer, has in the past been subjected to but slight quantitative measurement. Information regarding this mechanism is of great economic and social importance and the present report represents a first step to meet an urgent need.

To bridge the gap between producer and consumer, the first step is to meet, to perform those services which finally place products of all kinds in the hands of the consumer. It requires, however, a large amount of capital. The retail trade in Canada, for example, is estimated to have 67,000 establishments, which represents a capital investment of more than a billion and a half dollars. Sales amounted to \$1,500,000,000. Forty per cent of independent retail stores in Canada, of 10,000 population or over had sales of less than \$10,000, and twenty-three per cent had sales of less than \$5,000.

A grouping of stores according to size of capital investment shows that 70 per cent of the retail establishments reported, aggregated an investment of under \$10,000, while the same percentage of wholesale-retail stores extended into the \$60,000 class, and 70 per cent of wholesale stores reached into the \$100,000 group. Apart from general and departmental stores, grocery establishments had the largest amount of capital invested.

In retail establishments working capital was roughly twice fixed capital, in wholesale retail establishments it was roughly 2½ times, but in wholesale establishments, working capital was nearly 4 times as great as fixed capital. Many other interesting facts about trading establishments are shown in the report.

Canadian Flour In India

Calcutta Milling Manufacturers Flock Canadian Flour Is Needed

Experiments carried out by a Calcutta mill manufacturer with some samples of Canadian flour shipped to Calcutta by a Canadian miller firm have been highly satisfactory, writes Mr. H. F. Pennington, Canadian Trade Commissioner in Calcutta, in the Commercial Intelligence Journal. Indian bakers have been experimenting heavily losses due to the high percentage of breakage of flours made entirely of Indian flour. In one case, by mixing Canadian and Indian flours, breakage was reduced from 4.5 to 1.66 per cent. It is quite possible, as a result of such experiments, that in time, there will be a small but steady demand for Canadian flour in India.

Milk For Daily Feedings

The approximate amount of milk required to supply dairy factories in Canada during 1924, based on the quantity of milk delivered and the equivalent in milk of the butter fat content of the cream delivered, was 7,135,000,782 pounds.

Passer-by to "blind" beggar—"It seems to me that you can see."

"Beggar—"Oh, well, in these days competition is so great that even a blind man must keep his eyes open."

The yield from the plots receiving the stable manure alone, was 3,193 pounds, with 11.3 per cent marketable. The complete fertilizer alone gave an average yield of 9,200 pounds of potatoes, 75.2 per cent marketable. The return from the land receiving half fertilizer and half manure were practically equal to the plots receiving stable manure alone, amounting to 11,247 pounds of potatoes, with 84.8 per cent marketable. The land that received no fertilizer yielded an exceedingly poor crop of 5,787 pounds, with 67.3 per cent marketable.

Leslie Leonard—No man with any sense would allow you to carry on the way you do.

His Father—How do you know what a man with any sense would do?

Her Mother: "Young man, it would be better to marry my daughter if you could kill me."

Jenny: "Is that a promise?"

NEW POSTAGE STAMP

Here is shown a picture of the new Canadian postage stamp to be issued by the Dominion. The word "Post" is printed in two languages, and the picture of the king is retained.

Aerial Photography

In Winter Possible

New Process Is Expected To Revolutionize Timber Survey

A new process in aerial photography, which will revolutionize winter timber cruising, has been developed by International Airways of Canada, according to H. L. Bell, director of the photographic section at Ottawa. Mr. Bell declared that the new scheme would enable work to be done in areas which would normally be inaccessible. It would entail the employment of ground parties in considerable numbers.

The process, he said, made use of photography to show up varieties of standing timber when taken of the air. The approximate number of trees to a standard area of the photograph taken at a certain altitude would be used to calculate the number of trees of each variety in the whole area under survey, he declared.

The system is primarily a scheme to make aerial photography useful in winter.

Bachelor's Quarters At Marlborough House

Would Soon Be Induced Royal Bachelors Not To Go Overseas

British subjects who would like to see the Prince of Wales married have received another setback. The Prince's subjects who would like to see the Prince of Wales married have received another setback. The Prince's subjects who would like to see the Prince of Wales married have received another setback.

Two bedrooms and a sitting room, kitchen, bath and a very complete library are not the sort of arrangements British might expect for a Prince with a bride. The Prince will occupy the apartment, it is said, in preference to the more solid and stately rooms of the famous old house.

The "we-want-Wales-wed" contingent is gloomy.

Wit—But, my dear, no woman wants to look as though she came out of the Ark.

Husky—Huh! You women aren't so averse to looking as though you came out of the Garden of Eden, I notice.

Mistress—"You must exercise a little will power with him, nurse."

Nurse—"I do try to, mum, but you don't know his won't power."

If poets are born, a lot of them are unmade in after years.

"Your education is costing me a great deal," said the father to his son.

"I know, father," the boy replied. "And I don't study very hard either."

Young man, is your chief as liberty?

Always for beautiful young ladies, madam.

Then tell him his wife wishes to speak to him.

High Quality Of Crop

Stiffing and Baking Quality Of This Year's Crop Is Rated High

The milling and baking quality grade for grades of the 1925-26 wheat crop, on the whole, is distinctly superior to that of last year, according to a report of the Dominion Grain Research Laboratory of the Board of Grain Commissioners. The report, prepared by T. J. Burdett and T. R. Atkin, chemists for the Board, points out especially that the moisture content of all grades is low in strength, as contrasted with last year, and to date very little wheat—about one per cent—and no damp grain have appeared on the market. The weight per bushel of each grade is greater than that of last year, particularly the lower grades, proteins content of the wheat is higher in each grade; the quality of the protein, particularly in the lower grades, is superior to that of last year, and the baking quality of the flour from each grade is decidedly superior to that of last year.

Pleased With Canada

British Visitor Sees Opportunities Here For Young Men

"I have youth again and I should not hesitate to come to Canada," said John Gault, prospective president of Britain's largest organized group of farmers—the National Farmers' Union—after his recent tour of Canada, on a special mission for the Canadian Ministry of Agriculture.

"There are greater opportunities here for the young man with a little knowledge of farming than almost any other country in the world," in company with Arthur Adams, director of the University Farm at Cambridge, England. Mr. Gault has been busy investigating farm organization and labor-saving devices in Canada, with a view to reporting on what he has seen to the British farming community.

Alberta Fur Production

Province Expects Further Place In Canada In Production Of Fur

According to an announcement of the Provincial Game Guardian a total production of 2,356,353 is reported of the Province of Alberta for the year ending June 30, 1927. This is a slight advance over the figures of the previous season, and brings this province into fourth place for fur production, the Northwest Territories exceeding the output by \$100,000. The province of Ontario is reported as having produced 2,183,577, as compared with \$10,072,344 during the preceding year.

Enjoying Sound Prosperity

Canada Would Not Seem To Be The Favored Country

"With agriculture prosperous, manufacturing industries active, building and contracting, and the country in all parts of the country, and mines producing increasing quantities of ore, it is not surprising that the employment level for each month in 1925 should be well above the level of the corresponding months of any previous year. Import and export statistics reveal a large volume of trade and all indices of Canadian business conditions show that the country is enjoying a sound prosperity." Royal Bank of Canada Bulletin.

New Seed Cleaning Plant

Warehouse and Seed Cleaning Plant For Saskatoon

The Saskatchewan Registered Seed Growers Limited has arrangements under way for the establishment of a warehouse and seed cleaning plant at Saskatoon. It is announced by F. W. Towley-Smith, of Leaskville, one of the directors of the organization, that rapid increase in the business in seed grain is necessitating this move. Mr. Towley-Smith remarked. At present the seed cleaning plant at Moose Jaw is the only one in the province.

"Your education is costing me a great deal," said the father to his son.

"I know, father," the boy replied. "And I don't study very hard either."

Young man, is your chief as liberty?

Always for beautiful young ladies, madam.

Then tell him his wife wishes to speak to him.

"Denial—"Well, about loss for what's been the pay for the drinks. If it's been you, pay, Pat, and if it's been me, I'll pay, and if it's been me, I'll pay."

Nurse: "He seems to be wandering in his mind." The Nurse's Wife: "Oh, well, he can't stay that."

Wrangel Island Colony Starving

Steamer With Relief Supplies And Also Airplane Sent To Reach It

Here is a picture of five Russians and 25 Eskimos who have been cut off from the world on Wrangel Island since 1918, in a canoe much worse than the one in which they arrived.

The steamer Stavropol, assigned to carry the colony a three-year supply of food, fuel and medicine, failed to break through the ice and recently returned.

Orders have come from Premier Rykov that other measures must be taken to reach the island, since help next summer might be too late. An airplane that set out on the same mission as the ship was also compelled to return.

Wrangel Island has a record of tragedy which will pay frightful numbers of the Russian expedition residing there now. If, indeed, disaster has not already overtaken some, or all, of them.

In 1921 an expedition was fitted out by the Russian government, under the leadership of Vilhjálmur Stefánsson, the explorer, to take possession of the island. It was the last expedition that Stefánsson did not go. Stefánsson did not go to the expedition in the charge of a young Canadian, Allan Crawford, of Toronto.

The expedition landed on the island in 1922. Nothing more was heard of it until June, 1923, when a relief expedition found only Al. Blackack, an Eskimo seaman, as all of them.

One member of the expedition, Lorne Knight, had died of scurvy during the winter preceding it. It was found that the expedition, under Crawford, Frederick Maurer, and Milton Gault had not set to reach the island in 1923, they have never been heard from since.

Stories in the diaries of those on the island indicate an extreme shortage of food. Milton Gault writes in his record in August 1922, five months before he set out with his two companions, that the expedition had been dipping hard bread in grease all day long and never to eat.

Considerable controversy followed the revelation of the tragedy, in which the charge was heard from several sources that Stefánsson had been derelict in the fulfillment of his promise to those composing the expedition. However, it is said, that when the party left, the explorer had promised to come out the following summer with supplies for them.

Other evidence, however, pointed to the fact that Stefánsson had been derelict in his long experience in the Northwest. Culprits in the matter was the subject of considerable newspaper controversy for more than two years following the discovery of the tragedy late in 1922.

Wrangel Island is listed in the Encyclopedia Britannica as belonging to Russia, although claims of a part by both Britain and the United States might be supported by some circumstance or another.

Forty More School Districts Established In Alberta

Forty more school districts have been established in Alberta in the first nine months of 1928 making a grand total of about 3,500 in the Province including city, town and rural schools. School expansion is particularly in evidence in Northern Alberta.

Friend (volting hospital patient)—Do you know, old man, that's a swell looking nurse you've got?

Patient—I hadn't noticed.

Friend—Well, I had no idea you were so sick.

House Nurse—What's this room, with no ceiling and open to the sky?

Agent—It's the shower-bath-room. The house was built by a Scotchman.

Radium is worth \$175,000 an ounce.

"I must have been a terribly hard boy to teach that animal to sit up and beg!"—Nipper, London, Week, Berlin.

New Zealand goes in for Rabbits

One hundred of these chitinous rabbits made a twelve thousand mile journey over the supplies of the Canadian Pacific Express Company from Vancouver, British Columbia, to Auckland, New Zealand, where they will form the nucleus of a rabbit farm. The express messengers disarmed one lot of feed to them the voyage.

Badger Skins Are Valuable

Pelts Should Be Taken in the Right Season, However

Badger skins, if taken on animals at the right season, and not spoiled in handling, are now quite valuable. At the recent fair auction in Winnipeg the best badger skin sold for \$25.00, and a good average skin worth, perhaps, about \$20.00 to \$25.00. But many people are taking badger pelts during the late winter and fall, when the skins are worthless, or practically so. Badger skins are most valuable after the animals have come out of their winter retirement. Skins taken in the spring are valuable; those taken in the fall are almost worthless. About twenty thousand badger skins are marketed annually in the three Prairie provinces.

From Health Officials

Four prominent Canadian health officials have been appointed to the Canadian Laboratory Fellowship in the School of Hygiene, of the University of Toronto. They are Dr. R. L. Jackson, Edmonton; Dr. F. W. Jackson, Winnipeg; Dr. P. S. Leeder, Battleford, Sask.; Dr. Eva Mader, Kenilworth, N.B. The fellowship were established last year for the purpose of increasing the number of public health workers in Canada.

CHILDHOOD AILMENTS

Can Be Quickly Banished With Baby's Own Tablets

The ailments which afflict so many but little-children of them are due to one cause and one cause only—a disturbed condition of the stomach and bowels. To quickly banish such ailments, the mother should give her child the Baby's Own Tablets. These tablets are made of the most perfect ingredients and are most effective. No other medicine for little ones has had so much success as has Baby's Own Tablets. They banish constipation and indigestion; break up colic and simple fever; correct diarrhoea and colds and promote healthy growth by regulating the functions of the stomach and bowels. Containing the most perfect ingredients, Baby's Own Tablets, N.B. writes—"I cannot speak too highly of Baby's Own Tablets. They are the best thing I have ever used for my child."

Baby's Own Tablets are sold by all druggists. Write for a free booklet to a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Snappy Counselor
Mum—Forget it—(In a blase, forgetful tone) you are Tell you mean anything and it goes in one heat the boot the better. Don't (stare to protest)—Tell you women anything and, by gum, it goes in both ears, and never stops coming out your blooming mouths.

Family trees aren't like others. In other, appearance of the sap is an indication of continued vigor.

Miner's Lament
Loud Speaking Airplanes

New Form Of Advertising Making Cities More Noisy

"The advance of civilization has brought with it one development that cannot be regarded with equanimity. In New York, certain airplanes equipped with loud speakers fly over the city and indulge in outdoor advertising at its worst. Voices from these flying loud speakers have forth the merits of this or that face cream, movie, cigarette or what-not in a manner that can be heard all over the town. There is no escape from it. Any one in the streets below gets this raucous appeal to buy drummed into his helpless ears whether he likes it or not.

Our cities are noisy enough now. It might be a good thing to see if the statutes governing public nuisances cover the case.

Took Dramatic Measures
The fact recently has come to light that the very oldest newspaper in existence is, or was, the official "Pekin Gazette," which is said to have been produced continuously for more than thousand years. This Methuselah among newspapers not only claims an honorable old age, it claims a record in the line of 8 years. It is credibly stated that during its publication no fewer than 1,500 of the paper's editors have been executed. If this is correct, just imagine what the slaughter must have been among reporters.

Husband (reading latest about radio-television): "My word! This opens up some wonderful possibilities, does."

Wife—"Yes, my dear! Won't it be nice for me to be able to sit here and watch you working in your office when you're kept there at night?"

Groom—"Yes, lady, they eggs are fresh from the country."

"Suspicious Customer—"What country?"

When Capt. Malcolm Campbell completed his world's record automobile drive at Daytona Beach, his first request was for a cup of good, strong tea. The courageous Captain would have enjoyed Red Rose Tea because it is a blend of choicest Assam and Ceylon teas, whose characteristics above all others are strength and flavor, packed by men trained in the London tea markets. Sold by your grocer in plain, bright aluminum packages.

Northern Alberta Boys' and Girls' Swine Club

First Prize In C.P.R. Competition Won By Members Of Club At Winnipeg

First prize in the Canadian Pacific Railway Competition in the Boys' and Girls' Swine Club show for Northern Alberta, was won by Parfait Lantz and Harry Strimling, members of the Swine Club, at Winnipeg, on the New Canadian Pacific Fairgrounds.

Second prize went to Benny Fladd and Bernie Kotsch, of the Hardisty Club, and Thomas Lantz, of the Swine Club, of the Selkirk Club.

Handsome medals were presented to members of the winning team by Superintendent George Fox, of the Edmonton Division of the Canadian Pacific Railway. Both members of the team are of Ukrainian descent and are sons of prosperous farmers in the north. Each of the boys is 12 years old. Strimling is in grade ten at Dandridge school, and Lantz is working on his father's farm.

The Winnipeg team will proceed to Calgary where they will compete with the winners of the Canadian Pacific Club and the winners of the southern part of the province, for the trophy awarded to the highest scorer from any point along Canadian Pacific railway lines in Alberta, and a trip to the Toronto Royal Assn. as guests of the railway.

The Winnipeg team will proceed to Calgary where they will compete with the winners of the Canadian Pacific Club and the winners of the southern part of the province, for the trophy awarded to the highest scorer from any point along Canadian Pacific railway lines in Alberta, and a trip to the Toronto Royal Assn. as guests of the railway.

Local officials of the railway companies, of Provincial and Dominion departments of agriculture and livestock interests, are well pleased with the successful results of the Boys' and Girls' Club work during the past season, and credit is given to them for much of the improvement noted in recent years in the quality of pigs shipped to market from many districts in the province.

His Explanation

District Visitor—To what do you attribute your great age? Oldst Habitant—Well, for the first seventy years of my life there wasn't no motor cars, and for the last thirty years I've been confined to the house.

More than 2,000,000 women in Soviet Russia are members of trade unions.

It May Be Urgent

Heaviest Bakers
A census taken at a large hotel recently revealed the fact that Dutchman, not German, are the largest eaters in the world. Though the gentlemen from the land of canals and cloys does not eat quite so often as we do, he makes up for lost time at each of his two daily square meals.

The average Dutch breakfast, for example, would make a very good dinner for a Britisher, including as it does hot meat and large quantities of cheese.

German spends most of their money on good wine, while the American likes more "showy" forms of amusement such as the going shopping at fashionable establishments, and motoring.

Boston Bane Day-Walking
Great interest is displayed in Boston in the new idea of day-walking with the intention of abolishing the habit of day-walking. No pedestrian may cross a roadway at an intersection where directed to stop by a policeman. A \$20 fine is threatened for a violation of this rule. Every pedestrian crossing at a place other than a regular crossing must yield the right-of-way to any vehicle on the roadway, though it does not prevent the driver of the vehicle from the duty of exercising great care.

Strawberry Production
The largest proportion of Canadian strawberry production is in the Dominion. In addition Canada imports about 3,000,000 pounds of strawberries annually.

Slip! Ignorance is bliss! It seems silly to establish night schools.

Flatchin CASTORIA

Losing Sense Of Speed

Fifteen Miles An Hour Considered Slow These Days

Has the speed rate at which vehicles now travel, on the highways caused the loss of the sense of time and of speed? It seems that it has.

Three years ago a vehicle was considered as being driven quite rapidly when it covered the road at five miles an hour. Four miles an hour is said to be a rapid standard for walking.

Anyone walking in the dark who collides with another person walking, it covers a more modest rate, is unpleasantly surprised at the force of the impact. Yet neither person may be going at more than four miles per hour. Nevertheless, in the face of experience so well known, we speak of fifteen miles per hour as a very slow rate of locomotion. But facts are facts, and things are as they are, all talk to the contrary notwithstanding.

Are jurors, and magistrates, and judges, and others, called upon to adjudicate on the facts of existence, justified when they regard a rate of movement per hour in an accident as impossible to result in serious damage?

Actual experiment be seriously tried, and it will be found that, when two two-ton cars collide under such conditions, the impact is even greater. Drivers of cars should inform themselves upon such elementary questions.

Actual demonstrations have proven that serious property damage results when cars collide while proceeding at five miles per hour. They should regain our sense of speed and distance.

Recipes For This Week (By Betty Barclay)

VEAL BIRDS

2 pounds veal steak (sliced about 1/2 inch thick).
Cut steak into six to eight squares, depending on the size of bird desired. Marinate with salt and pepper. Place in a shallow pan of water and steam for one hour. Remove from water and stuff each veal square and skewer securely using at least four skewers each bird. Brown rapidly in fat first and then place in roasting pan in which frying fat has been used. Add 1 cup water, cover with roaster and let bake in oven for an hour. (Enough for six or eight veal birds).

A BRAND NEW HAININ SAUCE

1/2 cup chopped sweetened raisins.
1/2 cup raisins butter.
2 tablespoons flour.
1 teaspoon salt.
1 teaspoon pepper.
1/2 cup raisins butter.
1 tablespoon brown sugar.
1/2 cup water.
1 teaspoon cold butter.
1 small lemon, juice only.

Heat food chopper in boiling water and put raisins through medium chopper. Melt butter in saucepan and add salt, pepper, cayenne, and brown sugar. Mix well, add water and cook until mixture is thick, stirring constantly. Add chopped raisins, horseradish and lemon juice. Serve hot.

Proves Old Theory Wrong

Dutchman, Not German, Are World's Heaviest Eaters

A census taken at a large hotel recently revealed the fact that Dutchman, not German, are the largest eaters in the world. Though the gentlemen from the land of canals and cloys does not eat quite so often as we do, he makes up for lost time at each of his two daily square meals.

The average Dutch breakfast, for example, would make a very good dinner for a Britisher, including as it does hot meat and large quantities of cheese.

German spends most of their money on good wine, while the American likes more "showy" forms of amusement such as the going shopping at fashionable establishments, and motoring.

Tomb Of Columbus Found

Mementoes Indicate His Burial Near Badajoz, Spain

A commission sent by the Academy of History to investigate what is claimed by some to be the tomb of Christopher Columbus, at San Pedro de Badajoz, forty-five miles south of Badajoz, Spain, reported that there were no remains of Columbus. The commission also stated that a number of mementoes had been found with the inscription "Here lies Christopher Columbus, Admiral of the Ocean and the Indies by His Majesty, Ferdinand and Isabella." Enriquez is contended by some authorities to have been the real name of Columbus.

Canada's Pacific Gateway

Vancouver Rapidly Becoming One Of North America's Busiest Ports

Ships in the port of Vancouver are being loaded and unloaded at a rate that is causing the Canadian grain crop for export to markets abroad. It is estimated that Vancouver's share of the record harvest of 1927 may be more than 100,000 bushels. This splendid shipping business out of Canada's Pacific gateway has been growing steadily since 1921. As fast as new elevator accommodation is made available, an increasing volume of grain from Alberta and the western part of Saskatchewan is being poured into ships on the Pacific Coast. Much of it is carried south through the Panama Canal to Europe. Other grain-laden ships are heading out across the western sea lanes to Japan, Korea and other ports.

In addition to attracting an increasing proportion of the present Canadian wheat crop, it is quite probable that Vancouver will become the port of a magnificent new expansion of farming land in the Peace River country, north of Edmonton.

The Peace River flows across northern Alberta into Lake Athabasca. The farming country named after the Peace has an area of about 47,000,000 acres. It is, in part, in the same latitude as Scotland and Denmark. Some of the settlers in the Peace River country are raising wheat in crops of 70 bushels to the acre.

Crop Estimate

The Northwest Grain Dealers' Association estimates this year's wheat crop at 128,520,000 bushels, and that of other grains as follows: Oats, 317,714,800 bushels; barley, 91,273,000; rye, 11,569,000, and fax, 5,075,200.

"What are you doing in that tree, professor?"
"I'm hanging myself."

"But you must put the rope around your necks."

"I tried that, but I could not breathe."

Teacher—"Why, Marie! How can you come to school when your little brother has scarlet fever?"
Little Marie—"Well, Miss Brown, he's only my little brother."

LAID WANTED.—To do plain and light sewing at home, weekly or spare time. Good pay. Work sent by day. Write to Miss J. B. Smith, 1000 Main St., Montreal.
